

Reliable and Efficient Single Phase UPS Solutions

Today's business continuity demands a cost-effective power protection solution, for ensuring Power Continuity and Power Quality with optimal Total Cost of Ownership (TCO). The UPS range of Onfiniti is a true online double conversion topology UPS, designed with IGBT based rectifier & inverter to suit customer requirements.

Onfiniti provides maximum protection and power quality for entry level servers, workstations, communication equipments, ATMs etc...

Product Snapshot				
Power Rating	1 kVA - 10 kVA at 0.8 pf			
Configuration	Tower			
Voltage	220V/ 230V/ 240V			
Input Power Factor	0.99			

INTERNAL ISOLATION TRANSFORMER

Isolation transformer is a standard option in all Onfiniti FMI series models. This considerably reduces the footprint and requirement of additional cabling and switchgear. Isolation transformer provides maximum protection to the connected loads.

Flexible battery configuration

Battery blocks and their capacity can be configured by the user, as per the required variable backup time, based on the load connected.

Additional charger

The additional charger is a standard add-on option in Onfiniti UPS. It reduces the extra space/cabinet requirement. The additional charger is controlled by the UPS inverter controller and thus provides adequate protection from over voltage.

Display panel

The display interface provides real-time status of critical diagnostics and essential parameters like load demands, input voltage, battery status, etc.

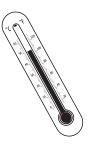

Conformal coating

Onfiniti UPS PC Boards comes as a standard with conformal coating. Conformal coating provides protection to the electronic circuits from harsh environments that may contain moisture and or chemical contaminants.

50°C operation

Onfiniti UPS withstand high operating temperatures. They can operate at 40°C at 100% capacity and up to 50°C at 80% capacity.

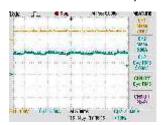

Polarity protection for battery connection

Polarity protection ensures that the battery connections are managed and installation is made easy.

Charger Ripple

The Onfiniti series is provided with adequate capacitor for minimum DC ripple<5% of the battery carry, with this limit the battery life will be considerably increased

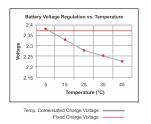

Over-voltage cut-off device

Over-voltage cut-off device protects the UPS from high input voltage and increases the stability and performance of UPS.

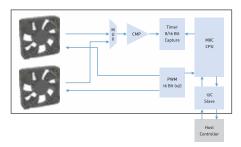

Temperature compensated battery charging

Onfiniti UPS automatically optimise the charging current, according to the operating temperature of the batteries. This feature extends the battery life considerably.

Intelligent fan operation

Intelligent fan operation manages and regulates fan speed, depending on the UPS requirements. It decreases power consumption and fan noise.

Advanced communication

The SNMP option in Onfiniti provides comprehensive UPS management and flexible configuration via web browser, NMS, Java Applet, Telnet, SNMP or Hyper Terminal. This technology provides reliable automatic event notification via E-mail, SMS*, WAP* and SNMP Trap. The included View Power software provides automatic shutdown for multiple PCs over the network.

Upgradable charger

The charger can be upgraded to extend the backup for over four hours.

Output voltage selection

Onfiniti UPS offer option to choose the output voltage (200V* / 208V* / 220V / 230V / 240V). * with output de-rating

SPECIFICATION

Parameters	1 kVA	2 kVA	3 kVA	5 kVA	6 kVA	7.5 kVA	10 kVA		
UPS details									
Тороlоду	True On-line Double Conversion UPS								
Output Power Capacity	800 W	1600 W	2400 W	4000 W	4800 W	6000 W	8000 W		
Specifications		1	· · ·						
Input									
Phase	Single Phase								
Voltage				230V AC					
Voltage Range	160V - 300V AC								
	110V - 300V AC @ 60% load 110V - 300V AC @ 50% load								
Power Factor				0.99					
Current THD	<10%								
Battery	36V 72V / 96V			192 - 240V					
Battery Charging	Constant Current & Constant Voltage with Optional Temperature Compensated Battery Charging								
Output									
Nominal Output Voltage	220VAC / 230VAC / 240VAC ± 1%								
Frequency	50Hz ± 0.1Hz								
Frequency Synchronisation	47.5 to 52.5Hz								
THDv	<3% Linear Load			<2% Linear Load					
	<5% Non Linear Load			<5% Non Linear Load					
Efficiency									
AC/AC (overall efficiency)		Up to 90%		Up to 92%					
ECO Mode	Up to 97%								
Overload Capacity									
105 - 110%	10 min			3 min					
111 - 130%	1 min			30 sec					
Communication									
RS232	Available								
USB Com Port	Available								
Intelligent slot			Optional - SNA	MP / MODBUS	/ Dry Contacts	5			
Operating Temp			0~	40°C Continue	OUS				
Electrical
